Greg,

Attached are the last several summaries which would include the last of the response items as the site moved into Act 2 remediation. The last weekly report lists quantities and disposal areas and the status reports list action items and sample results. After the instream monitoring was removed from Slagle's Run in late December we didn't really get big reports as the only program still actively working on it was our Environmental Cleanup Program. If you have any specific questions or want me to come along I'm willing to do it, pending availability. Let me know either way and enjoy your weekend.

Brian
